

## **Day 20**

**Objective:** To study email-based phishing and spoofing techniques.

**Work Description:** Email phishing mechanisms were discussed, including spoofed sender addresses and deceptive email content. The trainer explained how attackers bypass basic spam filters and trick users into opening malicious links or attachments. Concepts such as fake invoices, account warnings, and reward notifications were analyzed. Preventive measures like email verification and cautious behavior were emphasized.

**Outcome:** Understood risks of email phishing attacks.
